The United States President's Malaria Initiative (PMI) Impact Malaria Project

Description of Dataset:

Responses to an endline household survey collected in Atlantique Department, Benin, from October-December 2022 at the conclusion of a cluster randomized controlled intervention study (CDC IRB number 7254.0). These data correspond to individual behavioral items (from the standardized Malaria Behavior Survey, <https://malariabehaviorsurvey.org/>) administered at endline (EL) and analyzed according to group antenatal care (G-ANC) participation. Under the column "GANC," 0 denotes respondents who did not participate in G-ANC, while 1 denotes respondents who participated in G-ANC.

In the analysis, the numbering and coding of the frequency of specific responses follows the English-language version of the survey instrument below:
